

Denis Klimovich

Front-end developer

denis.klimovich.web@gmail.com

+48 78 9611176

portfolio: [kay4yk13.github.io](https://github.com/kay4yk13)

Productive developer with a rich experience in various fields and a passion for new technologies.

Have a proactive attitude towards the work-flow and live in general.

Tech skills & stack

Software Development Principles:

- KISS
- DRY
- SOLID
- Design Patterns

Front-end Development:

- HTML5
- CSS (ScSS, SASS)
 - Flexbox
 - CSS Grid
- Responsive markup
- JavaScript / TypeScript (ES6+)
- DOM & BOM interaction
- Webpack

Back-end Development:

- Laravel 8 (PHP Framework)
 - MVC architecture
 - Eloquent ORM
 - Routing and Middleware

Tools & Environment:

- VScode / PHPStorm
- Figma
- Linux(Ubuntu)
- Docker
- Postman
- DBeaver / pgAdmin
- MailTrap
- Slack
- Atlassian suit
- Notion
- ESLint

Version Control:

- GitLab / GitHub / Bitbucket
- Git flow
- CI/CD
- Cherry-picking
- SSH deploy to production
- NPM build (AWS + ServerPilot Ubuntu)

VueJS:

- Vuex store / Pinia
- Router
- Hooks
- Props-events / Provide-inject
- Mixins and filters
- Slots
- UI Frameworks
 - Vuetify
 - PrimeVue
- External libs/packages
 - Lodash
 - i18n

API:

- REST API
 - Filtering
 - Sorting
 - Pagination
- GraphQL
- Websockets

Soft Skills

- | | | |
|--|--|--|
| <ul style="list-style-type: none">• Daily reporting• Comprehensive educated | <ul style="list-style-type: none">• Attentive for details• Task decomposition | <ul style="list-style-type: none">• Collaborative• Teammates guidance |
|--|--|--|

My mentor taught me well that

"dev who asks a question can look dummy for 5 minutes, dev who never asks a question - is dummy for life"

Languages

- | | | |
|--|---|--|
| <ul style="list-style-type: none">• English - B2 | <ul style="list-style-type: none">• Belarusian - native | <ul style="list-style-type: none">• Russian - native |
|--|---|--|

Education

- Belarusian State Economic University, Advertisement & marketing, 2007-2012
- Front-end development with practicing menthor, internship on commercial projects, early 2021

Recent projects

Project	Transport management system
Period	November 2022 – Present
Project Role	Full-stack developer
Task executed	<ul style="list-style-type: none">● Application components development with VueJS and TypeScript:<ul style="list-style-type: none">○ Brand new functional components and extended from existing classes○ Extendable functional wrappers and mixins○ Chunked data collection from backend and assembling on FE-side○ Inefficient solutions refactoring● Backend (laravel) models/migrations/controllers/services creation with related logic● Models relations management● Vuetify elements implementation and customization
Project	SaaS solution for DIY crafting with social network features
Period	June 2022 – October 2022
Project Role	Front-end developer
Task executed	<ul style="list-style-type: none">● Develop components based on Figma designs● Responsive markup● JSON API (REST) integration in collaboration with BE developer● FE features implemented:<ul style="list-style-type: none">○ Auth (JWT), FE + server-side validation with HTTP status codes handling○ Catalog with sorting/filtering, product-page, gallery○ Implemented and customize touch-interactive elements (Swiper)○ Profile editor with Avatar uploader/cropper/editor○ Create Interfaces of core-feature components: scheme voice-reading and visual grid scheme editor○ UI Kit development○ Common elements and utils/helpers development
Project	Widget for Gambling streamers + management dashboard
Period	February 2022 – May 2022
Project Roles	Front-end developer, PjM, Designer
Task executed	<ul style="list-style-type: none">● Full application specification● Design the main interface from scratch● JSON API (REST) integration in collaboration with BE developer● User Flow and Data Flow (BE <--> FE) scripting● BE Endpoints adjustments● Full FE implementation:<ul style="list-style-type: none">○ Dynamic widgets for screen capture○ CRUD interface○ Auth (JWT), token refresh○ Cross-app logic○ Landing Page○ Production SSH FE deployment

Project	Internal service for staff management, backoffice
Period	October 2021 – February 2022
Project Role	Front-end developer
Task executed	<ul style="list-style-type: none"> • JSON API communication, vuex • Migrating static HTML to SPA; VueJS consuming API • Schedule for staff • Custom task/time tracking system • Metrics / graphs / reports analytics dashboards • Different pages & components development / polishing, including: <ul style="list-style-type: none"> ◦ Administration ◦ Profiles ◦ Projects ◦ Tickets
Project	CRM for e-commerce
Period	July 2021 – September 2021
Project Role	Front end developer
Task executed	<ul style="list-style-type: none"> • Development new modules with VueJS & Quasar framework on existing system • Communication with BE by internal API • 3rd party API integration: parcel service
Project	Tetris
Period	May 2021 – June 2021
Project Role	Front-end developer
Task executed	<ul style="list-style-type: none"> • Designed and developed all in-game conditional rendering algorithms with VueJS • Developed figures movement and rotation logic, collision detection • Implement state manager • Implement sprite based sound effects
Project	E-commerce catalog
Period	March 2021 – May 2021
Project Roles	Front-end developer
Task executed	<ul style="list-style-type: none"> • Created local running web application on HTML + vanilla JS • Stylize all the pages according to Figma mockups (opensource) • Migrated project to VueJS • Full FE implementation: <ul style="list-style-type: none"> ◦ Catalog, product card, cart page interlinked with vuex and router ◦ Rendering catalog from external source ◦ Google maps integration ◦ Deployment
